

Climate Change 2015 Information Request Logitech International SA

Module: Introduction

Page: Introduction

CC0.1

Introduction

Please give a general description and introduction to your organization.

Logitech is a world leader in products that connect people to the digital experiences they care about. Spanning multiple computing, communication and entertainment platforms, we develop and market innovative hardware and software products that enable or enhance digital navigation, music and video entertainment, gaming, social networking, and audio and video communication over the Internet.

Logitech has two operating segments, peripherals and video conferencing.

Our peripherals segment, which includes retail and OEM channels, encompasses the design, manufacturing and marketing of peripherals for PCs (personal computers), tablets and other digital platforms.

Our retail sales and marketing activities are organized into three geographic regions: Americas (including North and South America), EMEA (Europe, Middle East, Africa) and Asia Pacific (including, among other countries, China, Japan, Australia, Taiwan and India).

We sell our peripheral products to a network of distributors, retailers, and OEMs. Our worldwide retail network includes wholesale distributors, consumer electronics retailers, mass merchandisers, specialty electronics stores, computer and telecommunications stores, value-added resellers and online merchants. Our OEM customers include the majority of the world's largest PC manufacturers.

Our video conferencing segment encompasses the design, manufacturing and marketing of video conferencing products, infrastructure and services for the enterprise, public sector, and other business markets. Video conferencing products include scalable HD (high-definition) video communication endpoints, HD video conferencing systems with integrated monitors, video bridges and other infrastructure software and hardware to support large-scale video deployments, and services to support these products.

We sell our video conferencing products and services to distributors, value-added resellers, OEMs, and direct enterprise customers.

Since 1994, we have had our own manufacturing operations in Suzhou, China, which currently handles approximately half of our total production of peripheral products. We outsource the remaining production to contract manufacturers and original design manufacturers located in Asia. Our LifeSize video communications products are manufactured in Malaysia under contract with a third-party manufacturer.

In 2013 we extended our reporting boundary to include our leased facility in Suzhou which handles mostly SMT assembly for in-house produced products.

CC0.2

Reporting Year

Please state the start and end date of the year for which you are reporting data.

The current reporting year is the latest/most recent 12-month period for which data is reported. Enter the dates of this year first.

We request data for more than one reporting period for some emission accounting questions. Please provide data for the three years prior to the current reporting year if you have not provided this information before, or if this is the first time you have answered a CDP information request. (This does not apply if you have been offered and selected the option of answering the shorter questionnaire). If you are going to provide additional years of data, please give the dates of those reporting periods here. Work backwards from the most recent reporting year.

Please enter dates in following format: day(DD)/month(MM)/year(YYYY) (i.e. 31/01/2001).

Enter Periods that will be disclosed

Tue 01 Jan 2013 - Tue 31 Dec 2013

CC0.3

Country list configuration

Please select the countries for which you will be supplying data. If you are responding to the Electric Utilities module, this selection will be carried forward to assist you in completing your response.

Select country

China

CC0.4

Currency selection

Please select the currency in which you would like to submit your response. All financial information contained in the response should be in this currency.

USD(\$)

CC0.6

Modules

As part of the request for information on behalf of investors, electric utilities, companies with electric utility activities or assets, companies in the automobile or auto component manufacture sub-industries, companies in the oil and gas sub-industries, companies in the information technology and telecommunications sectors and companies in the food, beverage and tobacco industry group should complete supplementary questions in addition to the main questionnaire.

If you are in these sector groupings (according to the Global Industry Classification Standard (GICS)), the corresponding sector modules will not appear below but will automatically appear in the navigation bar when you save this page. If you want to query your classification, please email respond@cdp.net. If you have not been presented with a sector module that you consider would be appropriate for your company to answer, please select the module below. If you wish to view the questions first, please see <https://www.cdp.net/en-US/Programmes/Pages/More-questionnaires.aspx>.

Further Information

Module: Management**Page: CC1. Governance****CC1.1****Where is the highest level of direct responsibility for climate change within your organization?**

Senior Manager/Officer

CC1.1a**Please identify the position of the individual or name of the committee with this responsibility**

Senior Vice President, Worldwide Operations as owner of WW Sustainability, Corporate and Workplace Services Organisation.

CC1.2**Do you provide incentives for the management of climate change issues, including the attainment of targets?**

Yes

CC1.2a**Please provide further details on the incentives provided for the management of climate change issues**

Who is entitled to benefit from these incentives?	The type of incentives	Incentivized performance indicator	Comment
Environment/Sustainability managers	Monetary reward	Emissions reduction project Energy reduction project Efficiency project Other: Performance incentive	All Logitech employees are entitled to a performance related monetary bonus. The monetary reward is calculated based on overall company performance, the team and the individual. Logitech's global sustainability team including directors, managers, engineers and specialists are incentivised to meet personal performance goals related to their work in emissions and energy monitoring, reporting and reductions, continuous improvement and risk mitigation.
Facility managers	Monetary reward	Emissions reduction project Energy reduction project Efficiency project Other: Performance incentive	All Logitech employees are entitled to a performance related monetary bonus. The monetary reward is calculated based on overall company performance, the team and the individual. Logitech's global sustainability team including directors, managers, engineers and specialists are incentivised to meet personal performance goals related to their work in emissions and energy monitoring, reporting and reductions, continuous improvement and risk mitigation.
Risk managers	Monetary reward	Other: Performance incentive	All Logitech employees are entitled to a performance related monetary bonus. The monetary reward is calculated based on overall company performance, the team and the individual. Logitech's global sustainability team including directors, managers, engineers and specialists are incentivised to meet personal performance goals related to their work in emissions and energy monitoring, reporting and reductions, continuous improvement and risk mitigation.
Corporate executive team	Monetary reward	Other: Performance incentive	All Logitech employees are entitled to a performance related monetary bonus. The monetary reward is calculated based on overall company performance, the team and the individual. Logitech's global sustainability team including directors, managers, engineers and specialists are incentivised to meet personal performance goals related to their work in emissions and energy monitoring, reporting and reductions, continuous improvement and risk mitigation.

Further Information**Page: CC2. Strategy****CC2.1****Please select the option that best describes your risk management procedures with regard to climate change risks and opportunities**

Integrated into multi-disciplinary company wide risk management processes

CC2.1a**Please provide further details on your risk management procedures with regard to climate change risks and opportunities**

Frequency of monitoring	To whom are results reported?	Geographical areas considered	How far into the future are risks considered?	Comment

Annually	Senior manager/officer	All geographical areas where we operate are considered.	1 to 3 years	Risks such as earthquake, flooding, etc. are considered as far into the future as needed to adequately evaluate the risk and impact and prepare the necessary recovery plans.
----------	------------------------	---	--------------	---

CC2.1b

Please describe how your risk and opportunity identification processes are applied at both company and asset level

Logitech has crisis management, business continuity, and disaster recovery plans and capabilities in place for critical functions occurring throughout the enterprise. We have designed these plans to ensure that operational needs can be met in the event of a significant business disruption. Our commitment to Business Continuity is reflected in our adoption of corporate standards in the areas of plan development, review, training, updating, and testing. Above all, we recognize that an effective Business Continuity program must evolve and improve through the employment of effective management systems. To identify risks, threats and vulnerabilities, Logitech conducts business impact analysis and threat assessments to establish planning priorities and business vulnerabilities. The BIA (Business impact analysis) and TA (Threat Assessment) are updated as required by changes in business operations, locations, and organizational structure.

CC2.1c

How do you prioritize the risks and opportunities identified?

Climate change risks include have been identified and include tornadoes, heavy rain, lightning, hurricanes, and blizzards. These weather events cause infrastructure failure, building damage, transportation closure, employee injuries and personal hardship, and other similar effects. Severe weather often relates to the exposure of the site to external hydrological conditions such as flood zones and tsunami inundation areas. Risk ranking criteria is as follows:

- High: Site located in flood zone or 100-year or 500-year floodplain, or a history of more than 1 catastrophic severe weather event per 10 year period
- Moderate: Site located adjacent to 100-year or 500-year floodplain, or a history of catastrophic severe weather event, but occurring less frequent than once per 10 year period
- Low: Site not located in designated flood zone, or no history of catastrophic severe weather events

CC2.2

Is climate change integrated into your business strategy?

Yes

CC2.2a

Please describe the process of how climate change is integrated into your business strategy and any outcomes of this process

The Logitech Sustainability team's core function is to ensure that sound environmental, health and safety management practices have been integrated into all aspects of our business. Logitech aims to offer innovative products and services in a responsible and sustainable way. The Sustainability team is a corporate function. The Director of the Sustainability team reports directly to the SVP of Operations.

Manufacturing site targets have been established to reduce the levels of indirect GHG emissions during the manufacturing process.

Opportunities to reduce fuel, and resulting GHG emissions, through supply chain optimization have been identified and are pursued on an ongoing basis.

CC2.2c

Does your company use an internal price of carbon?

No, and we currently don't anticipate doing so in the next 2 years

CC2.3

Do you engage in activities that could either directly or indirectly influence public policy on climate change through any of the following? (tick all that apply)

CC2.4

Would your organization's board of directors support an international agreement between governments on climate change, which seeks to limit global temperature rise to under two degree Celsius from pre-industrial levels in line with IPCC scenarios such as RCP2.6?

No opinion

CC2.4a

Please describe your board's position on what an effective agreement would mean for your organization and activities that you are undertaking to help deliver this agreement at the 2015 United Nations Climate Change Conference in Paris (COP 21)

Further Information**Page: CC3. Targets and Initiatives****CC3.1**

Did you have an emissions reduction target that was active (ongoing or reached completion) in the reporting year?

Absolute target

CC3.1a

Please provide details of your absolute target

ID	Scope	% of emissions in scope	% reduction from base year	Base year	Base year emissions (metric tonnes CO2e)	Target year	Comment
Abs1	Scope 1+2	100%	20%	2010	16209	2018	Our target of 20% reduction is equivalent to 2,431 tonnes CO2e.
Abs2	Scope 2	100%	15%	2010	15777	2018	Our target of a 15% of power consumption is equivalent to 2,367 tonnes CO2e.

CC3.1d

For all of your targets, please provide details on the progress made in the reporting year

ID	% complete (time)	% complete (emissions)	Comment
Abs1	37.5%	60%	Up to the reported year (2013), we had already achieved a reduction of 1,919 tonnes CO2e or 12% of the targeted 20% saving.
Abs2	40%	87%	Up to the reported year (2013), we had already achieved a reduction of 1,624 tonnes CO2e or 13% of the targeted 15% saving.

CC3.2

Does the use of your goods and/or services directly enable GHG emissions to be avoided by a third party?

Yes

CC3.2a

Please provide details of how the use of your goods and/or services directly enable GHG emissions to be avoided by a third party

Logitech is acutely aware of the importance of integrating energy efficient design into our products. Logitech has a continuous improvement approach to product energy efficiency and it is a driving factor in our product development activities.

Logitech is subject to the EU's Energy-related Products (ErP) Directive, which aims to encourage manufacturers and importers to produce products designed to minimize overall environmental impact. Under the directive, Logitech must ensure that our energy-related products comply with applicable requirements, issue a declaration of conformity and mark the product with the 'CE' mark. The directive does not have binding requirements for specific products, but does define conditions and criteria for setting, through subsequent implementing measures, requirements regarding environmentally relevant product characteristics. To date the following implementing measures within the ErP directive are active and applicable to Logitech products:

- 1275/2008: Eco-design requirements for standby and off mode electric power consumption of electrical and electronic household and office equipment.
- 278/2009: Eco-design requirements for no-load condition power consumption and average active efficiency of external power supplies.

Logitech has assessed the applicability of these implementing measures on relevant product lines and has taken steps to ensure that our products meet the requirements. Adoption of the ErP directive is in all EU member states and conformity has been demonstrated by Logitech in conjunction with current CE conformity marking requirements. Where possible, Logitech has applied these standards of energy efficiency beyond the EU to other global geographies where our product sell.

In the U.S we are subject to Appliance Efficiency Regulations adopted via the U.S. Energy Independence and Security Act of 2007. The regulations set out standards for the energy consumption performance of products within the scope of the regulations, which includes some of Logitech's products. The standards apply to appliances sold or offered for sale throughout the U.S., and Logitech has redesigned or changed products to comply with these regulations.

In Australia and New Zealand, we are subject to the MEPS (Minimum Energy Performance Standards) regulations. These regulations set out standards for the energy consumption performance of products within the scope of the regulations, which includes some of Logitech's products. We have taken steps to modify products to ensure they are in compliance with MEPS.

CC3.3

Did you have emissions reduction initiatives that were active within the reporting year (this can include those in the planning and/or implementation phases)

Yes

CC3.3a

Please identify the total number of projects at each stage of development, and for those in the implementation stages, the estimated CO2e savings

Stage of development	Number of projects	Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)
Under investigation		
To be implemented*		
Implementation commenced*		
Implemented*	5	1097
Not to be implemented		

CC3.3b

For those initiatives implemented in the reporting year, please provide details in the table below

Activity type	Description of activity	Estimated annual CO2e savings (metric tonnes CO2e)	Scope	Voluntary/Mandatory	Annual monetary savings (unit currency - as specified in CC0.4)	Investment required (unit currency - as specified in CC0.4)	Payback period	Estimated lifetime of the initiative	Comment
Energy efficiency: Building services	Install time control of Lighting in supermarket at FA & FB workshop	76	Scope 2	Voluntary	13000	2000	<1 year	Ongoing	

Activity type	Description of activity	Estimated annual CO2e savings (metric tonnes CO2e)	Scope	Voluntary/ Mandatory	Annual monetary savings (unit currency - as specified in CC0.4)	Investment required (unit currency - as specified in CC0.4)	Payback period	Estimated lifetime of the initiative	Comment
Energy efficiency: Processes	Update conveyor line to Cell line.	122	Scope 2	Voluntary	21000	0	<1 year	Ongoing	No investment required
Energy efficiency: Building services	Shut down clean room in FB in off duty and holiday	35	Scope 2		6000	0	<1 year	Ongoing	No investment required
Energy efficiency: Building fabric	Optimize productivity (Combine FD2 into FB workshop)	800	Scope 2	Voluntary	140000	0	<1 year	Ongoing	No investment required
Energy efficiency: Building services	Install ID cooling system for chiller, save chiller power	64	Scope 2	Voluntary	11000	13000	1-3 years	Ongoing	

CC3.3c
What methods do you use to drive investment in emissions reduction activities?

Method	Comment
Financial optimization calculations	Low and no cost energy efficiency projects were initially introduced with proven success. With improvements in energy efficiency upgrades providing an investment return, Logitech is now committed to rolling out projects that meet return on investment expectations.
Compliance with regulatory requirements/standards	Logitech makes necessary investments to ensure we have complied with local, regional and international standards.

Further Information

CC4.1
Have you published information about your organization's response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s)

Publication	Status	Page/Section reference	Attach the document
In voluntary communications	Complete	16	https://www.cdp.net/sites/2015/34/10834/Climate Change 2015/Shared Documents/Attachments/CC4.1/logitech-sustainability-report-2013.pdf

Further Information

Module: Risks and Opportunities

Page: CC5. Climate Change Risks

CC5.1
Have you identified any inherent climate change risks that have the potential to generate a substantive change in your business operations, revenue or expenditure? Tick all that apply

- Risks driven by changes in regulation
- Risks driven by changes in physical climate parameters
- Risks driven by changes in other climate-related developments

CC5.1a
Please describe your inherent risks that are driven by changes in regulation

Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management
-------------	-------------	------------------	-----------	------------------	------------	---------------------	----------------------------------	-------------------	--------------------

<p>Product efficiency regulations and standards</p>	<p>Current or expected government policy on climate change may have implications for product specific requirements such as EU ErP Directive and Energy Star which has the effect of impacting product design and could potentially lead to more limited sources for product components at a potentially higher cost to Logitech, its suppliers and customers. However, as such product regulations are likely to lead to more energy efficient designs then it is expected that any increase in cost would be offset by the reduced running costs of the revised product design.</p>	<p>Increased operational cost</p>	<p>Unknown</p>	<p>Direct</p>	<p>More likely than not</p>	<p>Low</p>	<p>Unknown</p>		<p>Unknown</p>
---	--	-----------------------------------	----------------	---------------	-----------------------------	------------	----------------	--	----------------

CC5.1b

Please describe your inherent risks that are driven by change in physical climate parameters

Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management
<p>Other physical climate drivers</p>	<p>Operations activities could be impacted by extreme weather conditions which may interrupt business activities and consequently could result in increased costs and expenses, which may negatively impact revenue.</p>	<p>Other:</p>	<p>Unknown</p>	<p>Direct</p>	<p>More likely than not</p>	<p>Unknown</p>	<p>Unknown</p>	<p>From an operational risk management perspective, Logitech assesses risk to our operations based primarily on external hazards that could disrupt business functions. Generally, these threats take the form of natural disasters and human-caused disasters (some internal threats are evaluated as well such as hazardous substances, building fires, etc.). Risks and threats associated with climate change such as flooding, severe weather, wild fires (drought) are recognized, and appropriate response plans are developed in locations that are vulnerable to those events.</p>	<p>Unknown</p>

Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management
Tropical cyclones (hurricanes and typhoons)	Logitech recognizes that an effective business continuity program ensures the safety and wellbeing of our employees, and protects the interests of our customers, shareholders and other interested parties in the event of a disaster or other business disruption. Logitech has developed crisis management, business continuity, and disaster recovery plans designed to protect critical functions across the enterprise and allow for faster recovery in the event of a disaster or other business disruption.	Increased capital cost	Unknown	Direct	More likely than not	Unknown	Unknown	The following are the key plan elements that make up the foundation of our plan(s): Immediate Actions: Actions that need to be performed to transition from an emergency situation to business resumption activities. Business Recovery Procedures: Procedures for transitioning work to alternate locations, the re-prioritization of work activities, establishing virtual offices, or implementing manual contingencies. Internal and External Communications: Communications required to engage company resources, customers, suppliers, contractors, business partners, etc., to implement business continuity measures. Vital Resources Recovery or Replacement: Defined process for departments to obtain resources that are necessary to perform critical functions in the event of a disruption.	Unknown

CC5.1c

Please describe your inherent risks that are driven by changes in other climate-related developments

Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management
Other drivers	Operations activities could be impacted by extreme weather conditions which may interrupt business activities and consequently could result in increased costs and expenses, which may negatively impact revenue.	Other:		Direct	More likely than not	Unknown			

Further Information

Page: CC6. Climate Change Opportunities

CC6.1
Have you identified any inherent climate change opportunities that have the potential to generate a substantive change in your business operations, revenue or expenditure? Tick all that apply

Opportunities driven by changes in regulation

Opportunities driven by changes in other climate-related developments

CC6.1a
Please describe your inherent opportunities that are driven by changes in regulation

Opportunity driver	Description	Potential impact	Timeframe	Direct/Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management
Air pollution limits	Logitech's video collaboration group has a portfolio of teleconferencing solutions which allow business users to collaborate face to face online in small or large groups and from multiple locations. Air pollution limits are likely to encourage organizations to restrict employee travel, particularly if there if they become cost drivers and thereby entice more online participation.	Increased demand for existing products/services	3 to 6 years	Direct	Likely	Low-medium	Unknown.		
Carbon taxes	Logitech's video collaboration group has a portfolio of teleconferencing solutions which allow business users to collaborate face to face online in small or large groups and from multiple locations. Carbon taxes will contribute to heightened travel costs which is likely to encourage organizations to restrict employee travel and thereby entice more online participation.	Increased demand for existing products/services	3 to 6 years	Direct	More likely than not	Low-medium	Unknown.		

Opportunity driver	Description	Potential impact	Timeframe	Direct/Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management
Product efficiency regulations and standards	Current or expected government policy on climate change may have implications for product specific requirements such as EU ErP Directive and Energy Star which has the effect of impacting product design and could potentially lead to more limited sources for product components at a potentially higher cost to Logitech, its suppliers and customers. However, as such product regulations are likely to lead to more energy efficient designs then it is expected that any increase in cost would be offset by the reduced running costs of the revised product design.	Other:	Unknown	Direct	More likely than not	Low			

CC6.1c

Please describe the inherent opportunities that are driven by changes in other climate-related developments

Opportunity driver	Description	Potential impact	Timeframe	Direct/Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management
Reputation	Consumers are becoming more aware and better informing themselves of the environmental implications of their product choices. Logitech is a member of EICC and actively participates in reporting systems such as CDP and GRI as well as publishing our own annual Sustainability Report.	Increased stock price (market valuation)	3 to 6 years	Direct	Likely	Low	Unknown.		

CC6.1e

Please explain why you do not consider your company to be exposed to inherent opportunities driven by physical climate parameters that have the potential to generate a substantive change in your business operations, revenue or expenditure

The unpredictable nature of climate change is viewed as having potential negative impacts from an operational cost, continuity of supply and supply chain costs and management point of view. Logitech do not produce products which protect against weather extremes nor enable customers to avoid heating or cooling costs directly.

Further Information**Module: GHG Emissions Accounting, Energy and Fuel Use, and Trading**

Page: CC7. Emissions Methodology

CC7.1

Please provide your base year and base year emissions (Scopes 1 and 2)

Scope	Base year	Base year emissions (metric tonnes CO2e)
Scope 1	Fri 01 Jan 2010 - Fri 31 Dec 2010	432
Scope 2	Fri 01 Jan 2010 - Fri 31 Dec 2010	15777

CC7.2

Please give the name of the standard, protocol or methodology you have used to collect activity data and calculate Scope 1 and Scope 2 emissions

Please select the published methodologies that you use
IPCC Guidelines for National Greenhouse Gas Inventories, 2006

CC7.2a

If you have selected "Other" in CC7.2 please provide details of the standard, protocol or methodology you have used to collect activity data and calculate Scope 1 and Scope 2 emissions

CC7.3

Please give the source for the global warming potentials you have used

Gas	Reference
HFCs	IPCC Third Assessment Report (TAR - 20 year)
CO2	IPCC Third Assessment Report (TAR - 50 year)

CC7.4

Please give the emissions factors you have applied and their origin; alternatively, please attach an Excel spreadsheet with this data at the bottom of this page

Fuel/Material/Energy	Emission Factor	Unit	Reference
Natural gas	0.002	kg CO2e per MWh	IPCC
Diesel/Gas oil	0.0025	kg CO2e per MWh	IPCC
Electricity	0.0078	kg CO2e per MWh	IPCC

Further Information

In 2013 we extended the boundaries of our reported facilities to include another significant leased building in China. The new values for Scope 1 and Scope 2 emissions for 2010 reflect the new reporting boundary. Please see Logitech Sustainability Report, Pg 4.

Page: CC8. Emissions Data - (1 Jan 2013 - 31 Dec 2013)

CC8.1

Please select the boundary you are using for your Scope 1 and 2 greenhouse gas inventory

Operational control

CC8.2

Please provide your gross global Scope 1 emissions figures in metric tonnes CO2e

136

CC8.3

Please provide your gross global Scope 2 emissions figures in metric tonnes CO2e

14153

CC8.4

Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure?

No

CC8.5

Please estimate the level of uncertainty of the total gross global Scope 1 and 2 emissions figures that you have supplied and specify the sources of uncertainty in your data gathering, handling and calculations

Scope	Uncertainty range	Main sources of uncertainty	Please expand on the uncertainty in your data
-------	-------------------	-----------------------------	---

Scope 1	More than 2% but less than or equal to 5%	Metering/ Measurement Constraints	Logitech report the purchased electricity and hot water consumed on site solely on our owned facilities therefore there is a high degree of certainty in our data.
Scope 2	More than 2% but less than or equal to 5%	Metering/ Measurement Constraints	Logitech report the purchased electricity and hot water consumed on site solely on our owned facilities therefore there is a high degree of certainty in our data.

CC8.6

Please indicate the verification/assurance status that applies to your reported Scope 1 emissions

No third party verification or assurance

CC8.7

Please indicate the verification/assurance status that applies to your reported Scope 2 emissions

No third party verification or assurance

CC8.8

Please identify if any data points have been verified as part of the third party verification work undertaken, other than the verification of emissions figures reported in CC8.6, CC8.7 and CC14.2

Additional data points verified	Comment
No additional data verified	

CC8.9

Are carbon dioxide emissions from biologically sequestered carbon relevant to your organization?

No

Page: CC11. Energy**CC11.1**

What percentage of your total operational spend in the reporting year was on energy?

More than 0% but less than or equal to 5%

CC11.2

Please state how much fuel, electricity, heat, steam, and cooling in MWh your organization has purchased and consumed during the reporting year

Energy type	MWh
Fuel	256
Electricity	17964
Heat	
Steam	
Cooling	

CC11.3

Please complete the table by breaking down the total "Fuel" figure entered above by fuel type

Fuels	MWh
Motor gasoline	192.63
Diesel/Gas oil	66.59

CC11.4

Please provide details of the electricity, heat, steam or cooling amounts that were accounted at a low carbon emission factor in the Scope 2 figure reported in CC8.3

Basis for applying a low carbon emission factor	MWh associated with low carbon electricity, heat, steam or cooling	Comment
No purchases or generation of low carbon electricity, heat, steam or cooling accounted with a low carbon emissions factor

Page: CC12. Emissions Performance**CC12.1**

How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to the previous year?

Decreased

CC12.1a

Please identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined) and for each of them specify how your emissions compare to the previous year

Reason	Emissions value (percentage)	Direction of change	Comment
Emissions reduction activities	7	Decrease	
Divestment			
Acquisitions			
Mergers			
Change in output			
Change in methodology			
Change in boundary			
Change in physical operating conditions			
Unidentified			
Other			

CC12.2

Please describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tonnes CO₂e per unit currency total revenue

Intensity figure	Metric numerator	Metric denominator	% change from previous year	Direction of change from previous year	Reason for change
0.00671	metric tonnes CO ₂ e	unit total revenue	7	Decrease	Logitech's environmental and energy reporting boundaries are now inclusive of both owned and leased manufacturing facility in China.

CC12.3

Please describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tonnes CO₂e per full time equivalent (FTE) employee

Intensity figure	Metric numerator	Metric denominator	% change from previous year	Direction of change from previous year	Reason for change
5.93	metric tonnes CO ₂ e	FTE employee	7	Decrease	Logitech's environmental and energy reporting boundaries are now inclusive of both owned and leased manufacturing facility in China.

CC12.4

Please provide an additional intensity (normalized) metric that is appropriate to your business operations

Intensity figure	Metric numerator	Metric denominator	% change from previous year	Direction of change from previous year	Reason for change
0.8	metric tonnes CO ₂ e	megawatt hour (MWh)	0.1	Decrease	Reduction in on-site fuel consumption resulting in reduction in Scope 1 emissions and overall reduction in CO ₂ emissions per MWh.

Further Information

Please refer to Page 10 - ENERGY REDUCTION PLAN

Page: CC13. Emissions Trading**CC13.1**

Do you participate in any emissions trading schemes?

No, and we do not currently anticipate doing so in the next 2 years

CC13.2

Has your organization originated any project-based carbon credits or purchased any within the reporting period?

No

Further Information**Page: CC14. Scope 3 Emissions****CC14.1**

Please account for your organization's Scope 3 emissions, disclosing and explaining any exclusions

Sources of Scope 3 emissions	Evaluation status	metric tonnes CO2e	Emissions calculation methodology	Percentage of emissions calculated using data obtained from suppliers or value chain partners	Explanation
Purchased goods and services	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Capital goods	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Fuel-and-energy-related activities (not included in Scope 1 or 2)	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Upstream transportation and distribution	Not relevant, explanation provided			0.00%	Not currently relevant to within our reporting scope
Waste generated in operations	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Business travel	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Employee commuting	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Upstream leased assets	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Downstream transportation and distribution	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Processing of sold products	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Use of sold products	Not relevant, explanation provided				Not currently relevant to within our reporting scope
End of life treatment of sold products	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Downstream leased assets	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Franchises	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Investments	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Other (upstream)	Not relevant, explanation provided				Not currently relevant to within our reporting scope
Other (downstream)	Not relevant, explanation provided				Not currently relevant to within our reporting scope

CC14.2

Please indicate the verification/assurance status that applies to your reported Scope 3 emissions

No third party verification or assurance

CC14.3

Are you able to compare your Scope 3 emissions for the reporting year with those for the previous year for any sources?

No, we don't have any emissions data

CC14.4

Do you engage with any of the elements of your value chain on GHG emissions and climate change strategies? (Tick all that apply)

Yes, our suppliers

CC14.4a

Please give details of methods of engagement, your strategy for prioritizing engagements and measures of success

Logitech requests our top 10 suppliers (calculated based on procurement spend) to provide their facility energy and carbon data annually.

CC14.4b

To give a sense of scale of this engagement, please give the number of suppliers with whom you are engaging and the proportion of your total spend that they represent

Number of suppliers	% of total spend	Comment
10	31%	

CC14.4c

If you have data on your suppliers' GHG emissions and climate change strategies, please explain how you make use of that data

How you make use of the data	Please give details
Identifying GHG sources to prioritize for reduction actions	Initial questionnaire was to gauge the level of knowledge within our supply chain in regards to GHG data collection, energy management and converting energy to GHG data.

Further Information

Page: CC15. Sign Off

CC15.1

Please provide the following information for the person that has signed off (approved) your CDP climate change response

Name	Job title	Corresponding job category
Robert O'Mahony	Sr. Director Sustainability and Workplace Services	Other: Senior Director

Further Information

Module: ICT

Page: ICT1. Data center activities

ICT0.1a

Please identify whether "data centers" comprise a significant component of your business within your reporting boundary

No

Further Information

Page: ICT2. Provision of network/connectivity services

ICT0.1b

Please identify whether "provision of network/connectivity services" comprises a significant component of your business within your reporting boundary

No

Further Information

Page: ICT3. Manufacture or assembly of hardware/components

ICT0.1c

Please identify whether "manufacture or assembly of hardware/components" comprises a significant part of your business within your reporting boundary

Yes

ICT3.1

Please provide a description of the parts of your business that fall under "manufacture or assembly of hardware/components"

Logitech assembles products in our manufacturing plant in Suzhou. Approximately 25% of our sold products are assembled within the owned section of our manufacturing facility.

ICT3.2

Please provide your absolute Scope 1 and 2 emissions and electricity consumption for the manufacture or assembly of hardware/components part of your business

Business activity	Scope 1 emissions (metric tonnes CO2e)	Scope 2 emissions (metric tonnes CO2e)	Annual electricity consumption (MWh)	Electricity data collection method
Manufacture or assembly of hardware/components	136	14153	17964	Other: Invoices

ICT3.3

Please identify the percentage of your products meeting recognized energy efficiency standards/specifications by sales weighted volume (full product range)

Product type	Standard (sleep mode)	Percentage of products meeting the standard by sales volume (sleep mode)	Standard (standby mode)	Percentage of products meeting the standard by sales volume (standby mode)	Standard (in use mode)	Percentage of products meeting the standard by sales volume (in use mode)	Comment
							Logitech products are beyond the scope selected in product type. We manufacture wired and wireless PC peripherals and personal devices.

ICT3.4

Of the new products released in the reporting year, please identify the percentage (as a percentage of all new products in that product type category) that meet recognized energy efficiency standards/specifications

Product type	Standard (sleep mode)	Percentage of new products meeting the standard (sleep mode)	Standard (standby mode)	Percentage of new products meeting the standard (standby mode)	Standard (in use mode)	Percentage of new products meeting the standard (in use mode)	Comment
							Logitech products are beyond the scope selected in product type. We manufacture wired and wireless PC peripherals and personal devices.

ICT3.5

Please describe the efforts your organization has made to improve the energy efficiency of your products

Logitech has a continuous improvement approach to product energy efficiency and it is a driving factor in our product development activities. Please see our Sustainability Report Product section for further details.

All applicable products that utilize input power from the AC mains are manufactured and delivered with power management enabled.

ICT3.6

Please describe the GHG emissions abatement measures you have employed specifically in your ICT manufacturing operations

Reduced GHG emissions by 15% since 2010 in our manufacturing plant in Suzhou. Full details on energy reduction plan in Q CC3.3.

ICT3.7

Do you provide carbon emissions data to your clients regarding the hardware/component products they procure?

No

Further Information

Page: ICT4. Manufacture of software

ICT0.1d

Please identify whether "manufacture of software" comprises a significant component of your business within your reporting boundary

No

Further Information

Page: ICT5. Business services (office based activities)

ICT0.1e

Please identify whether "business services (office based activities)" comprise a significant component of your business within your reporting boundary

No

Further Information

Page: ICT6. Other activities

ICT0.1f

Please identify whether "other activities" comprise a significant component of your business within your reporting boundary

No
